

SEA SALT

ABOUT AGROHUB

Agro Hub International belongs to one of the most successful investment groups in Pakistan.

Our group also endeavors in garment, rice and salt export, real estate development and entertainment industry.

The company is located in Hub Industrial Area Karachi. Being part of this city helps us attract high skilled labor and fast access to the seaport.

Agro Hub is a premium manufacturer and worldwide exporter of Himalayan Pink Salt & Sea Salt. We have established the company in 2002 and since then we have been increasing the production and sales.

Our edible unit is completely automated State of the Art to alleviate chances of human exposure to food. We have installed stainless steel machinery with the end to end solution from washing to drying and separating the salt. We take pride in our unique tailor-made plant which has no analogs.

ABOUT SEA SALT

Salt is one of the three foremost ingredients to sustain a human life together with air and water.

Sea salt is a type of salt that comes out during the formation of completely natural organic sea water with no additives in the sea by sun and wind.

The benefits of sea salt are countless. It is very beneficial for health and has many benefits when fighting diseases. Sea salt contains 84 minerals such as iodine, magnesium, potassium, calcium which are very beneficial for our health. Those mineral components helping our body to perform vital functions.

TYPES OF SEA SALT

Arabian Sea Salt

- Harvested on the wind-swept shores of the Arabian Sea, these delicate sea salt are made in salt ponds by carefully scraping off the top layer of naturally formed salt crystals.

- The unique method used to collect this delicate finishing salt preserves its natural and clean, fresh flavor.

- It has a mellow mineral flavor.

TYPES OF SEA SALT

Mediterranean Sea Salt

- Mediterranean solar sea salts come directly from the pristine waters of the Mediterranean Sea.
- This region is free of pollution and has high evaporation rates, making it a very pure salt.
- Beautiful crystal white appearance.
- Our Mediterranean Sea Salt is low in moisture, clean and white and does not contain any additives.
- Magnesium is just one of the trace minerals found naturally in this salt and naturally prevents caking.
- The mild flavor of the Mediterranean Salt makes it a wonderful choice of salt that can be used in a wide variety of dishes.

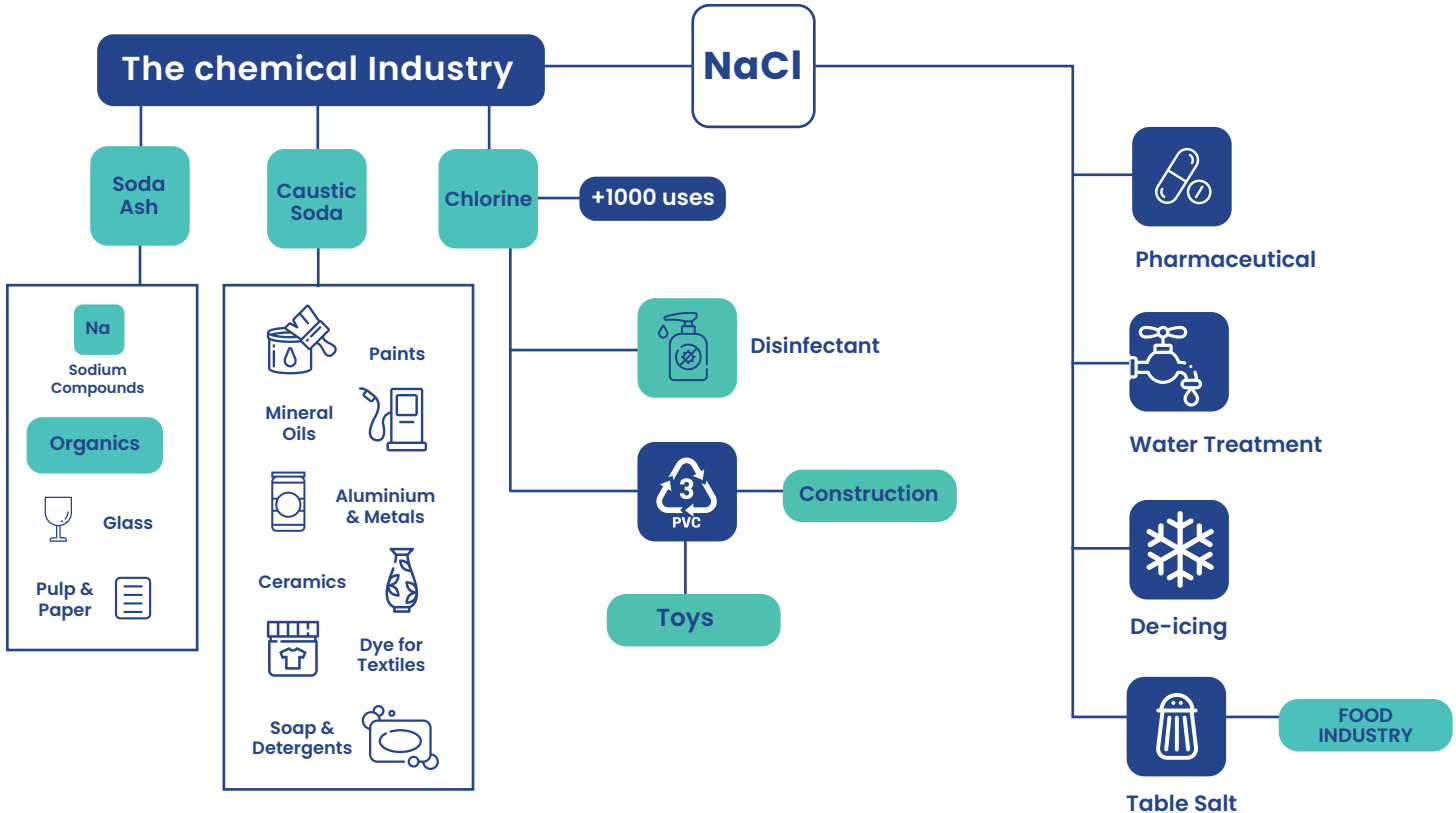

TYPES OF SEA SALT

Australian Sea Salt

- Harvested from evaporated water that is collected on inland salt basins along the Australian coast.
- Saline water is fed into crystallizer ponds where it evaporates, leaving salt as product.
- Removing this salt from the environment, is considered to be an ecologically sound practice in Australia.
- There are no chemical processes involved in the manufacture of the sea salt which is why we can guarantee it is perfectly natural and pure.

SEA SALT USES

SEA SALT FACTORY

Raw salt is first harvested from the ponds and then is transferred to the processing plant where a multi-stage process gets conducted.

The steps involved are:

We offer the high quality sea salt, our warehouse facility and infrastructure makes Agro Hub one of the largest exporters from Pakistan.

Our product is always available in various sizes and packaging.
